

# Choker Winter Baseball Camp

**\*\*ALL PARENTS/GUARDIANS AND PARTICIPANTS MUST READ, UNDERSTAND, AND SIGN THE CONCUSSION INFORMATION SHEET ON THE BACK!**

The **Grays Harbor College Men's Baseball Team**, along with their coaches, and the Aberdeen Parks & Recreation Department will be offering separate **Hitting & Pitching/Defense Camps** for boys and girls 8-14 years old. Participants must fit into the age group, **NO EXCEPTIONS!!** *The camp will be held on four different weekends in January and February at the Bishop Building in Pioneer Park.*

Camp dates are January 30, February 6, 13, & 20

### Hitting (\$40):

All ages from 10:00 to 11:30 a.m. each Saturday.  
Bring your own helmet and bat if you have them.

### Defense/Pitching (\$40):

All ages from 12:00 to 1:30 p.m. each Saturday.  
Bring your own glove.  
Catchers must provide their own gear.

The cost is **\$40.00 per camp** (defense/pitching or hitting) or **\$80.00** if you would like to attend both the defense/pitching and hitting camps. The price includes a camp tee-shirt. For more information, please call the Aberdeen Parks & Recreation Department at 537-3230.

Parents: Add the 'Aberdeen Parks' on Facebook for updates, results, and pictures of our events.

Write down the above information for your later reference.  
Please send the entire form back with payment.

**Please Mail to:** Aberdeen Parks & Recreation  
200 East Market  
Aberdeen, WA 98520  
\*Make checks payable to the City of Aberdeen

## *City of Aberdeen, Parks & Recreation Department* Concussion Information Sheet

**Adapted from the CDC and the 3rd International Conference on Concussion in Sport Document created 6/15/2009**

A concussion is a brain injury and all brain injuries are serious. They are caused by a bump, blow, or jolt to the head, or by a blow to another part of the body with the force transmitted to the head. They can range from mild to severe and can disrupt the way the brain normally works. Even though most concussions are mild, **all concussions are potentially serious and may result in complications including prolonged brain damage and death if not recognized and managed properly.** In other words, even a “ding” or a bump on the head can be serious. You can’t see a concussion and most sports concussions occur without loss of consciousness. Signs and symptoms of concussion may show up right after the injury or can take hours or days to fully appear. If your child reports any symptoms of concussion, or if you notice the symptoms or signs of concussion yourself, seek medical attention right away.

**Symptoms may include one or more of the following:**

Headaches	“Pressure in head”	Nausea or vomiting
Neck pain	Balance problems or dizziness	Blurred, double, or fuzzy vision
Sensitivity to light or noise	Feeling sluggish or slowed down	Feeling foggy or groggy
Drowsiness	Change in sleep patterns	Amnesia
“Don’t feel right”	Fatigue or low energy	Sadness
Nervousness or anxiety	Irritability	More emotional
Confusion	Repeating the same question/comment	
Concentration or memory problems (forgetting game plays)		

**Signs observed by teammates, parents and coaches include:**

Appears dazed	Vacant facial expression	Confused about assignment
Forgets plays	Is unsure of game, score, or opponent	Moves clumsily or displays incoordination
Answers questions slowly	Slurred speech	Shows behavior or personality changes
Can’t recall events prior to hit	Can’t recall events after hit	Seizures or convulsions
Loses consciousness	Any change in typical behavior or personality	

**What can happen if my child keeps on playing with a concussion or returns to soon?**

Athletes with the signs and symptoms of concussion should be removed from play immediately. Continuing to play with the signs and symptoms of a concussion leaves the young athlete especially vulnerable to greater injury. There is an increased risk of significant damage from a concussion for a period of time after that concussion occurs, particularly if the athlete suffers another concussion before completely recovering from the first one. This can lead to prolonged recovery, or even to severe brain swelling (second impact syndrome) with devastating and even fatal consequences. It is well known that adolescent or teenage athlete will often under report symptoms of injuries. And concussions are no different. As a result, education of administrators, coaches, parents and students is the key for student-athlete’s safety.

**If you think your child has suffered a concussion**

Any athlete even suspected of suffering a concussion should be removed from the game or practice immediately. No athlete may return to activity after an apparent head injury or concussion, regardless of how mild it seems or how quickly symptoms clear, without medical clearance. Close observation of the athlete should continue for several hours. The new “Zackery Lystedt Law” in Washington now requires the consistent and uniform implementation of long and well-established return to play concussion guidelines that have been recommended for several years: “a youth athlete who is suspected of sustaining a concussion or head injury in a practice or game shall be removed from competition at that time” and “...may not return to play until the athlete is evaluated by a licensed health care provider trained in the evaluation and management of concussion and received written clearance to return to play from that health care provider”. **You should also inform your child’s coach if you think that your child may have a concussion.** Remember its better to miss one game than miss the whole season. And when in doubt, the athlete sits out. For current and up-to-date information on concussions you can go to: <http://www.cdc.gov/ConcussionInYouthSports/>
